

GEM Systems, Inc.

will be exhibiting at the **79th SAA Annual Meeting** in Austin, Texas, USA! Come visit us at **Booth #411** at the Austin Convention Centre to learn more about **GEM's** advanced line of products. Exhibit hours are April 24-26 from 09:00-17:00.

Magnetics are an increasingly key method for archaeology. Main benefits lie in the ability to resolve details non-invasively, the wide range of artifacts and cultural affects that are detectable, and the low-cost of magnetics in comparison to other geophysical methods.
